Backlog Refinement

13 April 2024/ 12:45 / Zoom

Attendees

James Stanton, Herry Ye, Jarren Downward, Ruaan Maharaj

Agenda

- **Last Meeting Follow-up**
- **Backlog Refinement**
- **Assigning tasks**

Notes

- James opened the meeting by reminding everyone of the urgent requirements this sprint -user verification. He also read the other requirements needed for this project from the project brief. He stated he would put all these requirements into Taiga

- Herry suggested we need HTML pages to start the user verification and a repository to work with. The two pages are split between Herry and James

- Jarren volunteered to research the type of database needed and start the setup

- Ruaan volunteered to research third party identity providers and start the implementation and suggested that we discuss the points each user stories could have. Everyone agreed to use taiga to implement the points system for the tasks.

Action Items

1. Github repository setup - James

2. Login page - James

3. Registration page - Herry

4. Third party provider research - Ruaan

5. Database research - Jarren

6. Requirements Backlog - James

User stories

- Preventing Registration with Existing Username - 10 points
- Unsuccessful Login with Nonexistent Username - 10 points
- Successful Registration with Correct Credentials - 10 points
- Unsuccessful Login with Incorrect Password - 10 points
